

# Philips SmartPath

Collaborating with you to achieve long-term success

## Modality Resources

For SmartPath offerings specific to your system, click on the appropriate imaging modality link at [www.Philips.com/SmartPath](http://www.Philips.com/SmartPath).

Or, contact your Philips representative for more information.

SmartPath demonstrates Philips commitment to provide solutions throughout the life of your system, from initial investment through replacement. SmartPath allows you easy access to the latest updates, upgrades and innovations throughout the product lifecycle.

We understand how critical it is for you to maintain the highest standards of efficiency and quality of patient care. SmartPath is designed to keep your system at peak performance, so you can provide quality patient care.

## SmartPath consists of three complementary steps:

### Optimize

Improve your system performance through regular updates to the latest software and hardware standards.

### Enhance

Take advantage of new functionality, clinical innovations and workflow efficiencies to expand clinical capabilities.

### Transform

Affirm your industry leadership with conversion or full replacement to next generation solutions.

Optimize

Enhance

Transform

“We put a great deal of effort into developing our systems so they can be enhanced to maintain state-of-the-art levels.”

*Rokus Harder, Director, Global Lifecycle Business, Philips Healthcare*
