

Patient Name:	Jones, Susan	Study Date:	04/12/2009 4:24pm
Patient No.	1234	Referring MD:	Martin Mathis, M.D.
LMP:	09/12/2008	Sonographer:	Patty Smith, RDMS
GA by LMP:	30.3 weeks	DOB, Age:	07/07/1967, 41
GA by First Study:	30.3 weeks	Pregnancies:	Gravida 1, Para 0000
GA by Today's US:	30.4 weeks	ICD-9:	1234.5 Sample code
History/Indications:	Abnormal previous sonogram	GA Selected:	30.3 weeks (From First US)
		EDD:	06/19/2009

Biometry & Growth

Measurement	GA	Range	Source	% for 30.3 wks	Ratios
BPD 7.6 cm	30.5 wk	(27.4-33.6)	Hadlock	BPD 53%	FL/BPD 0.76 (0.71 - 0.87)
HC 28.0 cm	30.7 wk	(27.7-33.7)	Hadlock	HC 56%	FL/AC 0.22 (0.20 - 0.24)
AC 26.0 cm	30.2 wk	(27.2-33.2)	Hadlock	AC 48%	HC/AC 1.08 (0.97 - 1.16)
FL 5.8 cm	30.3 wk	(27.3-33.3)	Hadlock	FL 51%	Ceph. Ind. 0.76 (0.70 - 0.86)
HL 5.2 cm	30.3 wk	(27.6-33.0)	Jeanty	HL 51%	

GA for sonogram 30.4 wk (27.4 - 33.3)
based on (HL, BPD, FL) Average

Fetal Weight Estimate

Weight: 1545 gm / 3lbs, 6oz (1319 - 1770) Hadlock
Normal: 1504 gm (1069 - 2149) Brenner
Wt% 53% for 30.3 wks

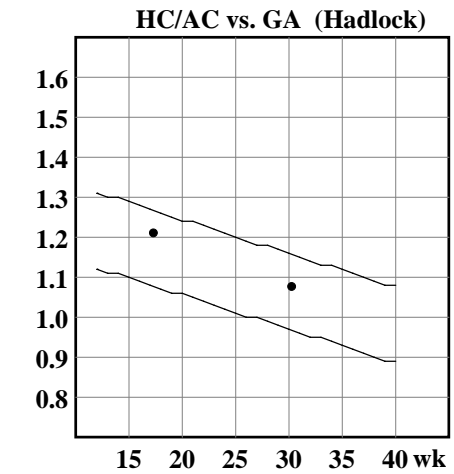

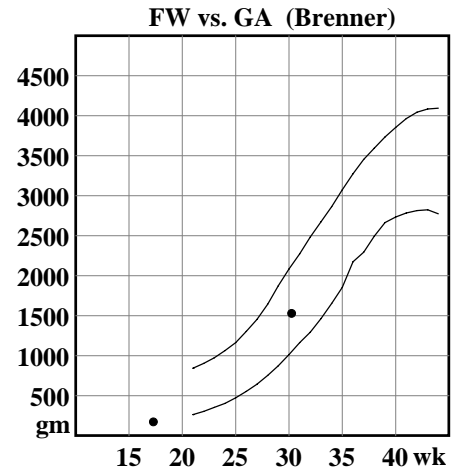

Clinical Summary

The uterus has a normal appearance. Cervical length is normal
Both ovaries are visualized and are unremarkable.
A single viable intrauterine gestation is seen. Fetal movement and tone are noted.
Amniotic fluid volume appears normal.
Fetal position is cephalic.
PLACENTA: Posterior, grade II

The lateral (anterior and posterior) ventricles appear normal on today's exam.
Intracranial anatomy appears to be normal on today's exam.

William Gray, M.D.
